TODAY'S CHICKS

A 16mm. sound motion picture, in color; 2 reels, running time 18 minutes.

Today's chicks are produced by a highly specialized industry of more than 9,000 commercial hatcheries. Many of these hatcheries operate under the National Poultry Improvement Plan. This plan is a Federal-State supervised program to improve breeding qualities and reduce losses from pullorum disease in our nation's poultry flocks. The film shows how a typical hatcheryman, with the cooperation of flock owners, specialized poultry breeders and Plan supervisors, can build a program that will result in better chicks. Scenes cover the basic operations of this program, including selecting breeders, methods of testing them for pullorum disease, sanitation procedures in the hatchery and in the field, and the production of pedigreed breeding stock. Emphasis is given to the point that poultry raisers should carefully choose their sources of chicks.
